Dear Mr. Harkness:

Re: Solid Waste Processing Facility Permit
Permit Modification
Sanitec of Indiana
Treatment Facility
FP 49-54
Marion County

Recent cases of Ebola in the United States have illustrated the waste management and disposal challenges communities face when responding to this disease. Processing and disposing of Ebola-contaminated wastes presents significant public health and worker safety concerns that may not have been accounted for when your facility was originally permitted. IDEM is taking the precautionary step of prohibiting your facility from accepting and processing wastes contaminated or comingled with Category A infectious substances, including Ebola. You may receive approval to process these wastes by documenting the safety and effectiveness of your equipment and operating procedures for these wastes.

IDEM is authorized by IC 13-19-3-8.2(2), to prohibit processing of specific wastes at a solid waste processing facility. Effective immediately, the Sanitec of Indiana Treatment Facility must not accept or process wastes contaminated or comingled with Category A infectious substances regulated under the Hazardous Materials Regulations at 49 CFR 171-180.

If you are interested in processing wastes contaminated or comingled with Category A infectious substances, please contact IDEM to arrange a meeting before submitting any information.

The facility is a medical waste processor, and it is located at 2020 Montcalm Street in Indianapolis.
